

# National Initiatives for Open Science in Europe

NI4OS-Europe national dissemination event in  
North Macedonia  
30th March 2022

Eleni Toli, ATHENA RC  
NI4OS-Europe project director

# Overview of the presentation

- Southeast Europe area
- National Open Science Initiatives (NOSCI) in SEE
- Conclusions

Southeast Europe

## □ Diversity - different levels of maturity of:

- Open Science policies & initiatives
- Research Infrastructures
- Research & Education policies
- Political instability often affects introduction & implementation of OS policies at national level
- Science collaboration across countries the region lacks sustainable structures

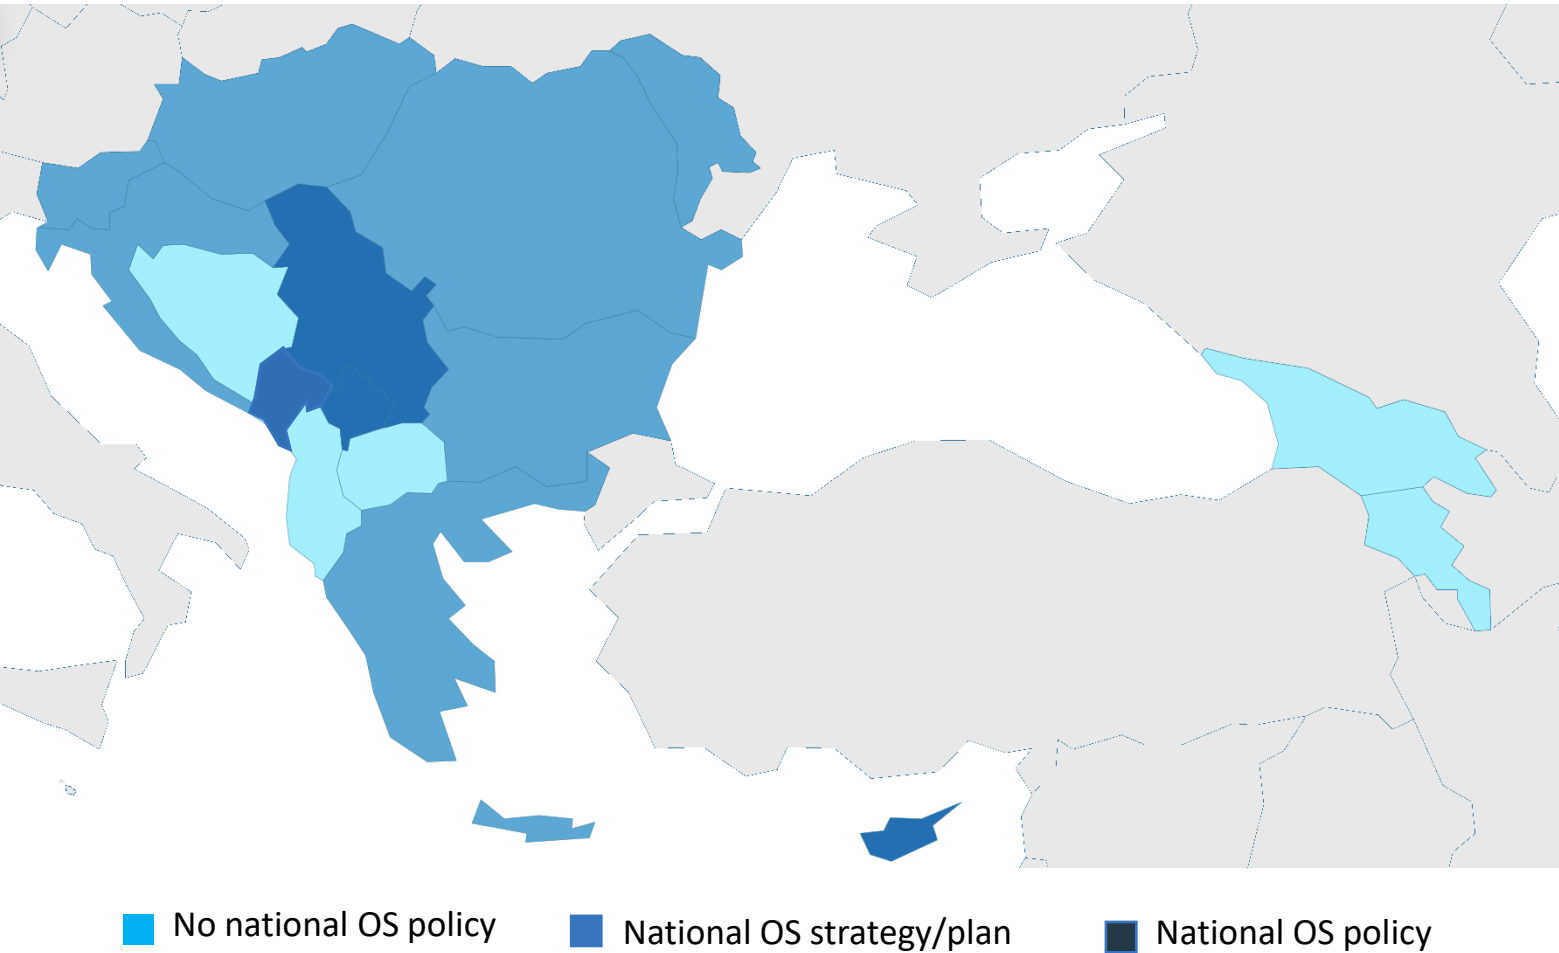

## • Regional collaboration for EOSC

## • Integration, interconnection and consolidation through ESFRI

- Political support from 12 countries in several ESFRI RIs
- Participation across all scientific domains, from various institutions from region
- 3 countries no ESFRIs (Armenia, Georgia, Montenegro) → role of EOSC in the support of RI users

15 Member States and Associated Countries | 22 Partners

3 different levels in the region:

- Initial actions within the country
- OS policy documents exist
- National OS strategy/plan or officially established initiative exists

# Landscaping: Familiarity with EOSC

- Not very familiar with EOSC
- Knowledge about FAIR principles is slightly higher (in comparison to EOSC)
- OS facilitators & supporter are better informed & involved

**Operators of  
services for  
research &  
technology**

**Open Science  
communities &  
infrastructures**

## **Policies | Governance | Inclusion**

Support the development and inclusion of the national Open Science Cloud (OSC) initiatives in 15 Member States and Associated Countries in the overall scheme of EOSC governance

## **Training | Research Communities Engagement | Awareness**

Spread the EOSC and FAIR principles in the community and train it

## **Service Development | Technical Support**

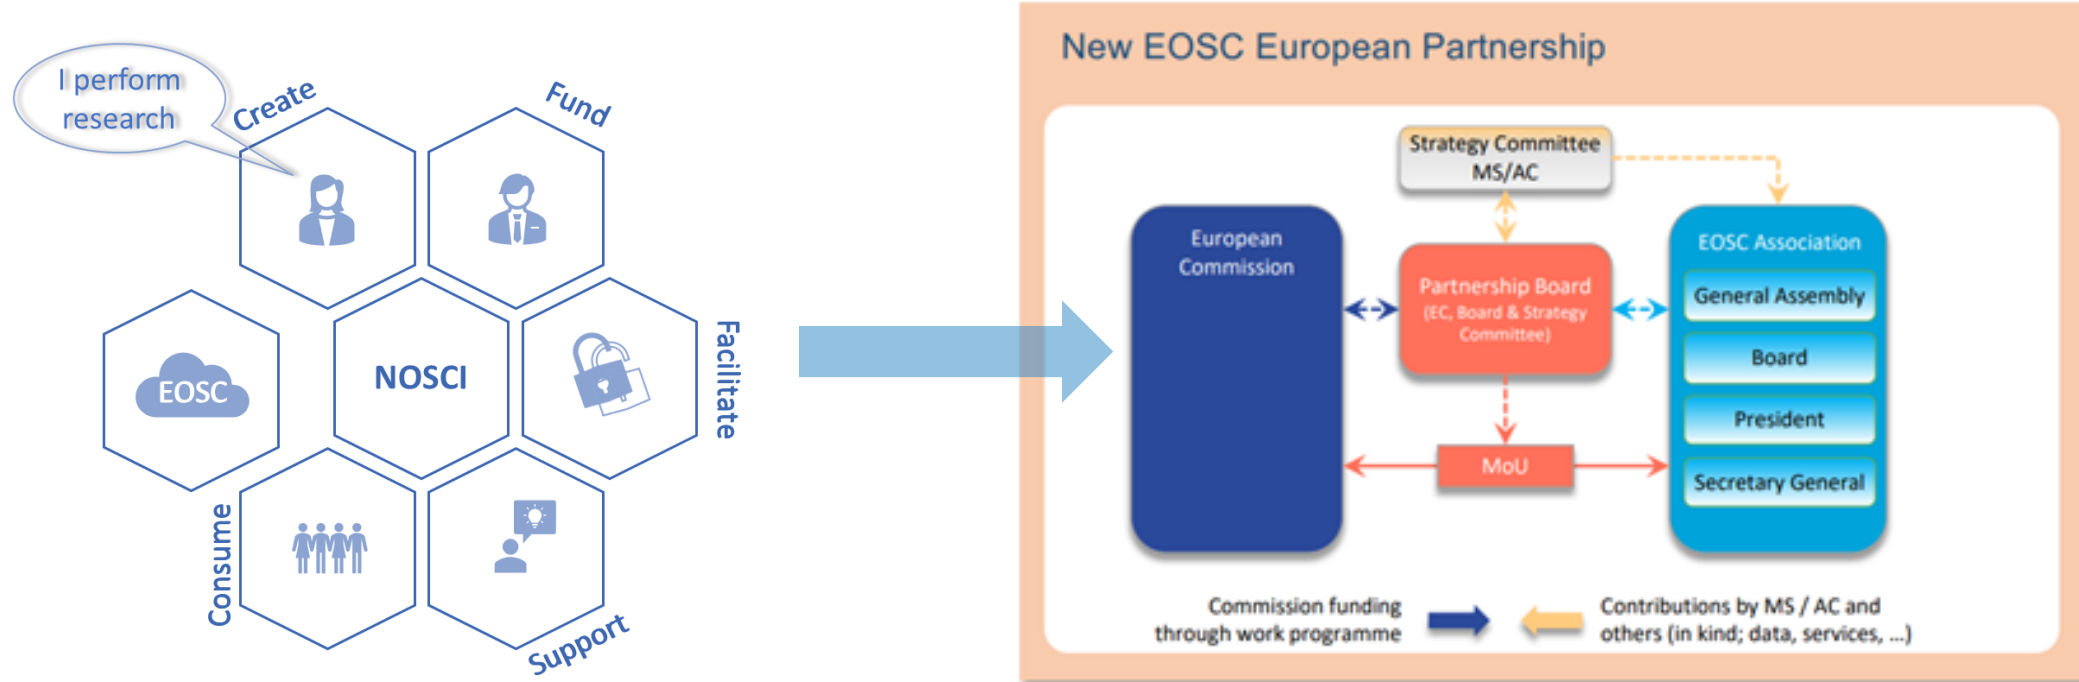

Provide technical and policy support in on-boarding of the existing and future service providers into EOSC, develop services supporting ORDM and FAIR

NOSCI in SEE

# National structures supporting EOOSC

**National Open Science Cloud Initiatives – NOSCI:** living national OS ecosystems that support EOOSC Governance and embrace diversity and OS maturity of countries

# NOSCI: tangible outcomes & EOSC-A representation

## Set-up approach

### Top-down

Cyprus  
Slovenia

### Bottom-up

Armenia, Georgia  
Greece, Montenegro

### Hybrid

Albania, Bosnia-Herzegovina,  
Bulgaria, Croatia, Hungary, Moldova,  
North Macedonia, Romania, Serbia

## Governance model

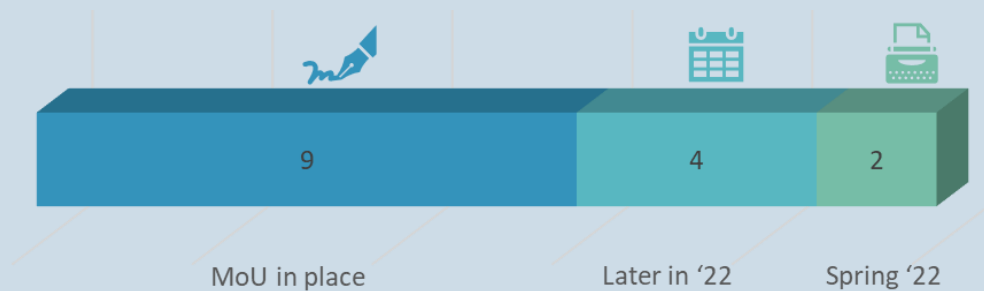

■ Consortium ■ Single organisation ■ Other ■ N/A

> 150 official members (organisations)

> 300 attendees in national events

## MoU status

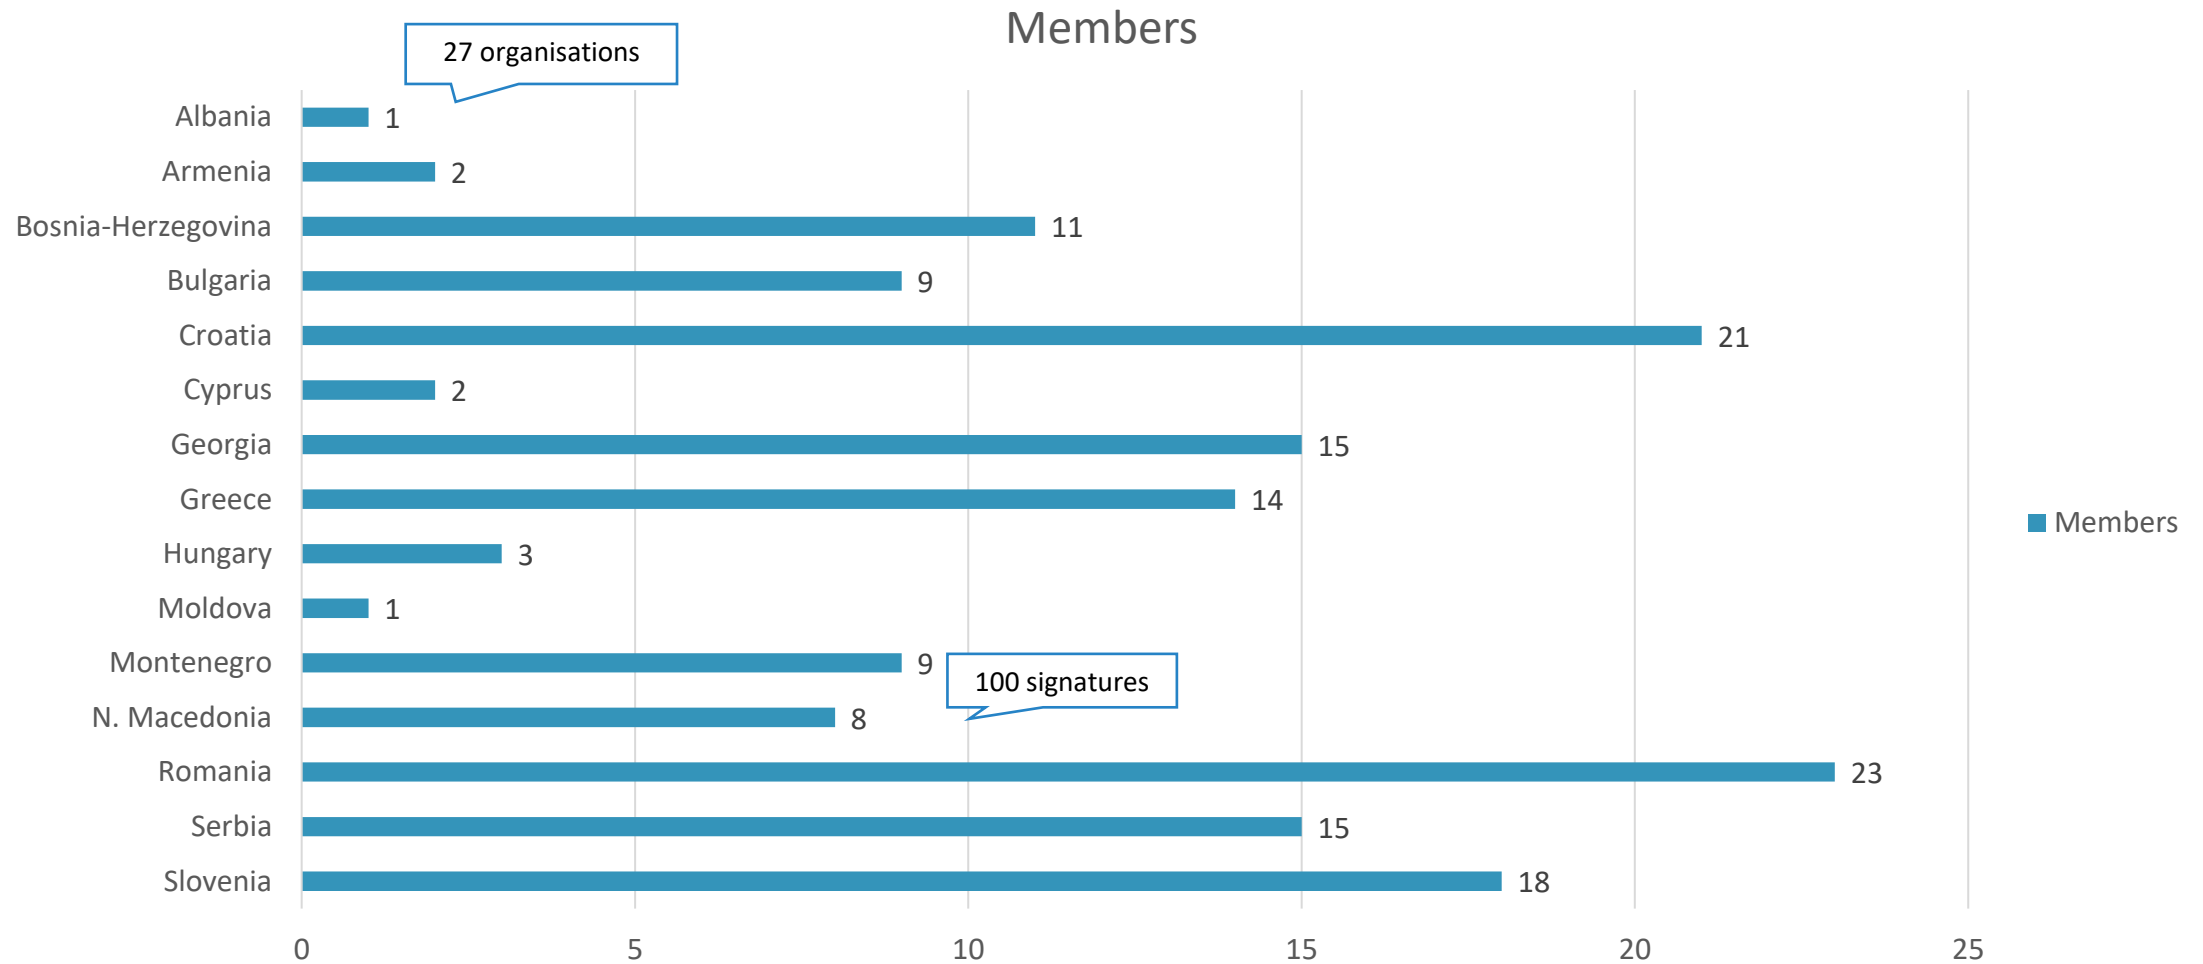

## NI4OS-Europe region in EOSC-A

6 Mandated organisations

12 Members

6 Observers

# NI4OS Toolbox for supporting NOSCI

## Setting up options

### Top down

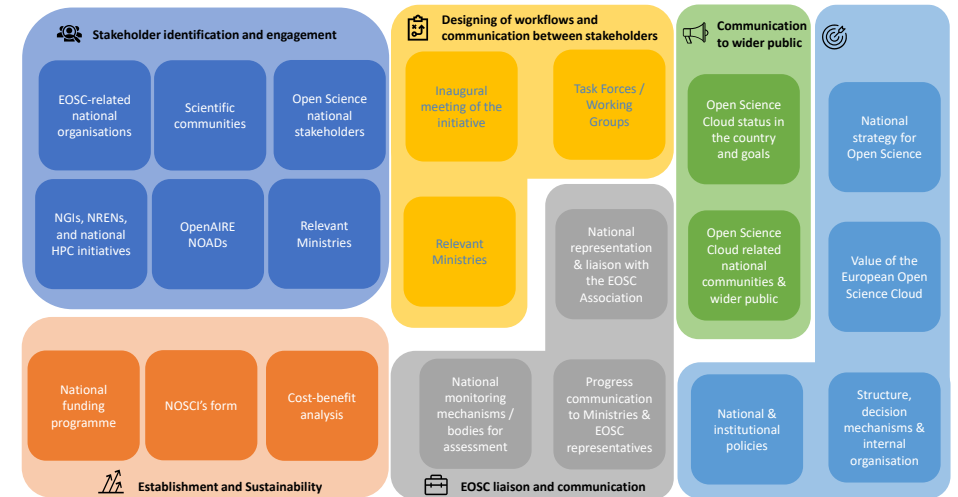

Central decision of the related ministry or national research funding organisation

### Bottom up

Initiative by researchers, OS stakeholders and actors in the country

### Hybrid

Combination of previous two, independently of who initiated it

## NOSCI setup toolbox

- Modular methodologies & workflows
- Assessment & monitoring
- Operational aspects & sustainability

## Tools

*Addressing principles; focus on legal aspects and EOSC*

- LCT- License Clearance Tool  
<https://lct.ni4os.eu/>
- RoLECT - EOSC RoP Legal & Ethics Compliance  
<https://rolect.ni4os.eu>
- RePol – Repository Policy Generator  
<https://repol.ni4os.eu>

## Training

*Promoting practices and skills – uptake*

- Network of trainers
- Resources on Open and FAIR RDM  
FAIR Maturity Model, FAIRify, ORDM training, ...
- Supporting material produced  
Translations, guidelines, incentives

## Onboarding

*Applying principles in practice – implementation*

- Pre-production environment  
AGORA, ARGO, AAI
- On-boarding support  
generic & thematic services and repositories
- Demonstrators  
4 scientific communities  
Open call for combination of thematic & generic services and repositories to simulate real-life scientific problems

## Community

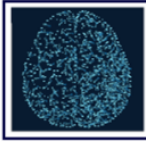

*Creating awareness; building capacity*

- NOSCIs  
OS stakeholders in each country supporting EOSC governance
- Network of EOSC promoters  
EOSC ambassadors highlighting on the ground FAIR & OS
- Network of translation officers  
Speaking FAIR and OS in national languages

Concluding, but not closing...

- Close collaboration with all actors, dissemination of NOSCI work
- Work on harmonizing the views on OS policies within the NOSCI
- Catalogue of national services, single point of access for the country
- Aim at engaging from the beginning and working close with the responsible ministries
- Formalise collaboration choosing the solution that suits NOSCI stakeholders best

- FAIR and Open Science:
  - progress is visible (e.g. national OS plans in several countries), but effort is still need needed to persuade stakeholders to embrace OS
  - Training activities have greatly contributed to it
- Inclusiveness and collaboration within the country
  - Important for the formation, representation and the sustainability
  - Poses challenges during the setting-up phase
- Funding schemes and models
  - Big discussion, as services and initiatives become more mature
  - Provision of and access to services (especially cross-border), procurement
  - What are the suitable organizational models?
- Relation to EOSC
  - EOSC Association is still in the process of defining the relation / collaboration with EOSC projects and national structures
  - NOSCIs can benefit from the participation in the EOSC-A Task Forces (→ knowledge & information sharing, plus updates on governance)
  - Active support to EOSC capacity building

# Thank you for your attention!

## Questions?

# EOSC Association - participation
